Thanks, Jeff!! Note: I'm removing Jeff and Danny from this (and hopefully ALL future) threads tonight.

I'm also ALWAYS available at [Personal Phone/Ex. 6] (text or call).

And hopefully my EPA email will not go down yet AGAIN tonight. If I don't respond really quickly, try [Personal Email/Ex. 6] or [Personal Phone/Ex. 6] and I will see it right away.

Thanks, everyone! And thanks so much for the hard work you've all been doing on the updated GIS map!!

Subject: ***CRITICAL NOTE Tim Davis email issue

All - please CC all web emails to Tim Davis at **Personal Email/Ex. 6** as well as his EPA email.

That is Tim's own email. He asked me to ask you this, because he's having trouble with epa Outlook.

Tim will likely see tonight only emails to **Personal Email/Ex. 6**

All - I created a draft revision Web CMS page with the working Map code. Please fwd to anyone not on this "Reply all" msg.

1) You will have to log-in to see the draft revision.

Use this link to log in using your standard EPA computer ID and password.

<https://wcms.epa.gov/user?destination=node/106189/revisions/221415/view>

2) if I may offer one comment - change default to "on" for the EPA data points.

3) As of this email, I'm handing off to Tim Davis' capable hands. I will be back on-call tomorrow 9-5 ET (7-3 MT).

Remember, you are looking at content now of a test layer.
The viewer that we are polishing up will have information
regarding that feature.

Those features are also displayed in the legend so users will know what those points are representing.

On Aug 15, 2015, at 10:34, Morin, Jeff <Morin.Jeff@epa.gov> wrote:

If I can offer a technical suggestion, best is to provide a simple code to post, like a iFrame. The map viewer we posted yesterday embedded the map in an iFrame tag, which worked fine.

Best to avoid having to upload support files, external javascript or xml calls, or CSS .classes. The EPA Web CMS disables those, or makes them difficult to work around.

<Burgo.Daniel@epa.gov> wrote:

Dan,

Based on the conference call with Eric

Delgado, Marty McComb, and myself I am codifying some of the points we discussed.

The OPS viewer url and login info is below. This viewer is a more robust version of the Public Version.

<https://gis.eparm.net/goldkingops/#/-107.8340/37.2698/12>

user=
pass=
Nonresponsive

The tentative timeline for the viewer will be tomorrow morning for a slimmed down version of the Public Viewer by tomorrow morning. It will contain locations and data displayed that have been submitted to HQ in the three links – trend graphs, analytical link, and water quality. The tool, SADIE, that is in the OPS viewer is going to be replaced with a webpage based analytical report. Over the course of a few days (possibly by Monday) we will finish QC'ing the latest monitoring data and working through the data differences between the three regions.

Eric/Marty/Janine,

If there is anything you want to add or about this please chime in.

Thanks everyone,

Dan
